

RUGGED. RELIABLE. READY.

DRCC

Self-Contained Design – Ready to deploy anytime, anywhere

Flexible Power Options - Operates on multiple power sources for maximum adaptability

VPN Connectivity – Secure wireline operations from the field or command post

Internet Optional – Functions seamlessly with or without connectivity using DRA Modules

Built on Proven Technology – Powered by the trusted Mindshare MAXPlus G2 platform

Two-Pin Headset Compatible – Standardized interface for quick plug-and-play use

High-Output Audio – Dual built-in 15-watt speakers deliver clear, loud communications

Directional Microphone – Optimized voice pickup, even in noisy environments

Channel Patching – Bridge and manage multiple channels instantly

Integrated Paging – Reliable alerting and dispatch capability

VoIP Phone Integration – Extend communication beyond radios with voice over IP

Instant Replay Recorder – Quickly replay the last transmission at the push of a button

Proven Industry-Standard Connectors – Built with Neutrik® PowerCON and EtherCON interfaces for rugged, reliable power and network connections.

Expandable & Future-Ready – Modular design allows easy integration of additional radios, networks, or features as needs grow.
